MARK DANIEL FERDINANDAZ

CYBERSECURITY ANALYST | JUNIOR SOC ANALYST

ferddanmark@gmail.com | +94 77 803 4343 | Negombo, Sri Lanka | mxrkdxnl.com

SUMMARY

Computer Science undergraduate specialising in cybersecurity, with practical hardware and office IT-support experience. Familiar with Windows endpoints, basic networking, access control, secure password practices and technical troubleshooting. Currently developing hands-on skills in SIEM, log analysis, incident response, vulnerability management and Python. Seeking an entry-level Cybersecurity Analyst, Junior SOC Analyst or SOC Intern role.

WORK EXPERIENCE

Jr. Divisional Hardware Engineer | Jubilant FoodWorks Lanka (Pvt) Ltd. **Oct 2023 - Jan 2024 (Part time)**

- Managed and maintained Gampaha Districts' Dominos Plzza company infrastructure
- Diagnosed desktops, laptops, printers, peripherals, pos devices and basic connectivity issues.
- Replaced approved components, recorded faults and escalated issues requiring specialist support.
- Communicated with staff and confirmed equipment operation after support.

Office IT Support Assistant | Prime Tech Limited **Jun 2025 - Feb 2026 (Part time)**

- Supported common office hardware, software and connectivity issues.
- Helped users with device setup and simple technical problems.
- Documented issues and escalated problems needing higher access or specialist support.

EDUCATION

BSc (Hons) Cyber-Security **2025 - 2027**
Staffordshire University, UK | APIIT Sri Lanka.

University Foundation of Science (Computing/IT) **2023 - 2024**
Edith Cowan University Sri Lanka

Aquinas Higher Diploma in Advanced English **2022 Aug - 2024**
BCI University, Sri Lanka

Certification in Hardware Engineering **2023**
BCI University, Sri Lanka

PROJECTS

Performance and Development Tracker - Altrium International
Contributed to a React, Vite, Express, Sequelize and MySQL system for performance reviews and development plans. Work included role-based access rules, protected API behaviour, password hashing, data validation, manual testing, SQL checks and demonstration preparation.

Professional Development - Staffordshire University
Building practical skills in SIEM and log analysis, incident response, vulnerability management, Linux, meta sploit, nmap, wireshark, burp suite, cloud security and Python through structured labs and portfolio work.

CORE SKILLS

- Security monitoring and basic alert triage
- Basic networking: TCP/IP, DNS and Wi-Fi
- Basic IR and vulnerability management
- Technical documentation and clear communication
- Windows endpoint and hardware support
- Access control and secure password practices
- Python and structured error solving
- Teamwork and continuous learning
